5mm

Unmatch ease to get the best and
most appropriate for your interior

UV Layer

The top layer of UV coating on the screen serves its main function to protect the flooring from scratches and stains. Consequently, Vinyl flooring is not only durable but also easy to clean.

Wear Layer

It serves the same function as the UV layer, enhancing durability during use.

Print Film

This section is where Vinyl flooring decorations are crafted, resulting in diverse, colorful, and textured appearances.

SPC

The core or base material located in the fourth layer. This is where synthetic rubber mixed with plastic is situated, giving Vinyl flooring its strong and flexible characteristics.
